

Quality Policy

Clarke & Severn Electronics is an Australian company distributing Passive Electronic Connectors and Components, RF/Microwave Components and Manufactured Subsystems to Customer Specifications including Cable Assemblies and Overmolded Cables to Customers in Australia, New Zealand and Overseas.

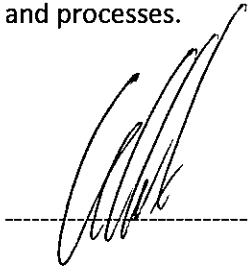

Our strategic objective is to bring customers concepts to life with "Solutions that Fit" by providing quality products and services which make a positive difference to our customer's success and well-being.

To achieve these objectives, we actively engage with our customers in decisions relating to the project requirements, to identify their needs. We understand that we must provide a management system which embraces the principles of both Quality Assurance and Continuous Improvement of our products and services and which also meets all statutory and regulatory requirements.

We recognise that Quality Assurance provides customer confidence and an assurance to ourselves that our products and services are meeting their expectations.

As a company to achieve these objectives and excel where possible, the management and staff of Clarke & Severn Electronics has committed to the requirements of an ISO 9001:2015 Quality Management System and following the principles laid down in this Standard will provide a framework for us to achieve these goals.

We will undertake to monitor and review our Quality Objectives to ensure continual improvement of our systems and processes.

Glenn Clarke

Managing Director
